**Subject:** Apple Bundles for CCSD

Kim, et al;

Enclosed are the Apple Bundles for CCSD. These bundles are for new schools, middle school labs and any additional school needs outside of the Power To Learn Initiative.

These bundles based on the current state contract (GA State Contract 5000546-042), but include special pricing for Cobb only and are for purchasing only. The bundle prices include set-up and installation in the price. Set up and installation are normally outside of the standard education price and are normally ordered as a separate line item.

The PDF is an explanation of the bundles including configuration, ordering and shipping instructions.

\*

The Excel Sheet is the actual pricing sheets of the bundles and are on separate tabs.

\*

Please note that the special part numbers are pending. Brennen Pinchback, our insides sales executive will have them available in the next 48 hours. Schools ordering can call him for a final written quote with part numbers and quantities. His contact information is included in both documents. As soon as the bundled part numbers are available, we will update the document and send it out again.

Also please note that we have established two bundles for the 12" iBook. One is a 5-pack (5 units in one box) and the other is a single-pack (1 unit per box). For orders of 5 or more, the 5-pack bundle should be used.

The special pricing is extended for all orders purchased in the month of June. We can discuss extending the pricing in July and beyond as needed, but are subject to change.

If you have any questions, please do not hesitate to contact me directly.

Regards,

Jim
